

Hand coffee grinder
Grinder cleaning

- ① Jar
- ② Rubber ring (O-ring)
- ③ Bean container
- ④ Lid (with O-Ring)
- ⑤ Hand crank
- ⑥ Hand knob
- ⑦ Adjustment wheel
- ⑧ Mechanism
- ⑨ Grinding cone

Seemühlen-Manufaktur Instructions for cleaning the grinding mechanism

To ensure that you can enjoy your grinder for as long as possible, we recommend cleaning the grinding mechanism from time to time.

Cleaning with rice or granules

Residues from the oil in coffee beans can affect the taste. The residues in the CrushGrind grinder are minimal, but we still recommend cleaning the grinder from time to time with rice or cleaning granules (like Grindz). The best way to do this is as follows:

1. Fill the ground coffee container completely with the cleaning granules.
2. Set the grind setting to 4 clicks on the adjustment wheel.
3. Grind the entire contents.
4. Tap out the ground coffee lid thoroughly and brush it out.
5. It is best to disassemble the ceramic grinder and clean it with a slightly damp sponge.
6. Set the grind setting back to the desired grind setting (see operating instructions).
7. Step 5 can be skipped, but in this case, first grind a coffee spoonful of coffee and discard the ground coffee so that no residual powder mixes with the coffee.

The ceramic grinder is easy to disassemble and clean. To do this, completely loosen the adjustment wheel ⑦ and remove the grinding cone ⑨. Dry thoroughly or allow to dry before reassembling!
