

Safety instructions from Seemühlen Manufaktur

General information

These safety instructions apply to all spice mills and hand coffee grinders from Seemühlen Manufaktur.

When using our products –especially in connection with spices or coffee beans– please always exercise particular caution when children are present. Ensure that no small parts or spices can be swallowed.

Spice mills

- Only use our spice mills to grind dry spices (e.g., pepper, salt, dried herbs). Not suitable for moist, oily, or sticky ingredients.
- Our steel grinding mechanisms and the cutting edges of the steel graters (e.g., chili or nutmeg mills) are sharp. Be careful when cleaning – risk of injury!
- Store Seemühlen in a dry place.
- Avoid excessive contact with water or moisture. Wood is porous and can swell or warp.
- Do not expose the mills to high temperatures (e.g., near ovens or heating devices).
- Wood should not be exposed to direct sunlight for long periods of time, as UV radiation can cause the material to fade and become brittle.
- The sea mills (wooden body and grinding mechanism) are not dishwasher safe.

Hand coffee mills

- Our hand coffee mills are intended exclusively for grinding roasted coffee beans. Do not use them for other foods such as nuts or moist ingredients.
- Children may only use the mill under adult supervision.
- Otherwise, the same safety instructions apply as for spice mills.

Disposal instructions

- Steel grinding mechanism: Dispose of at a recycling center.
- Ceramic grinding mechanism: Dispose of in the general waste.
- Plastic parts: Dispose of in the yellow bag, at a recycling center, or at a recycling facility.
- Wooden elements: Dispose of in the general waste.
- Cardboard: Our recycled cardboard can be disposed of in the household paper waste.
